

To whom it may concern:

This note is just to let you know how I personally feel in regard of this nonsense (NAB's petition 04-160).

How could it be possible, that us, customers who are paying for a service, be limited to what we are actually paying for? It is insane.

I oppose 100% and hope that FCC rejects the NAB's petition 04-160. The service is great and most of all WE are paying for it, it is not free and therefore it is unbelievable what is trying to be done.
